

HSPD-12 — Secure Badgeholders®

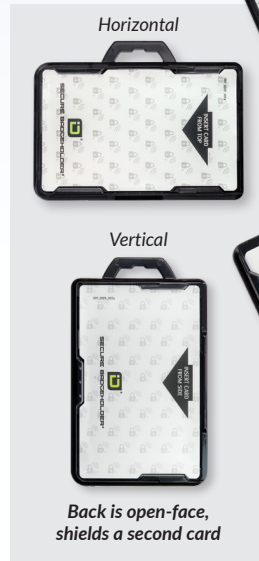

Identity Stronghold Secure Badgeholder® – Duolite

Available in a huge variety of color options, this dual card, open-faced badge holder is shielded on both sides.

Manufactured of transparent rigid polycarbonate, this holder is as tough as nails. The product is designed to allow for your choice of top load or side load and requires your credential to be partially removed to be read in your building access readers. The one piece, top-mounted attachment point is incredibly durable and compatible with all standard lanyards, reels and badge clips.

GSA APL #: 1284

- Rigid polycarbonate
- Holds and shields two HSPD-12 credentials
- Top load (front), side load (back)
- Slide card upwards / sideways out of holder for use with physical access readers

Identity Stronghold Secure Badgeholder® – Classic

Sleek and innovative, this single card, open-faced design supports the industry's only "squeeze to read" functionality.

Designed to clearly display your federal credential and allow for quick and easy building entry, this holder contains squeeze tabs at the top which allow the ID card to be read in your PACS readers without card removal. Once the tabs are released, the holder returns to a closed position, shielding your identity immediately. Manufactured of rigid Polycarbonate, available in a whole host of transparent color options, and compatible with any standard badge accessory.

GSA APL # 1283

- Rigid polycarbonate
- Single card, top load, open-face
- Squeeze Activation Tabs on front cover for use with physical access readers
- DOES NOT require RFID card to be removed for use with PACS readers
